Web Application Projects Highlights

</div>

1. **Hospital Management System (IPD Section)**

   Scope Of work: Develop a system to manage all the activity related to an indoor patient after registration. Which Includes bed allotment, Ward, nursing records, Medicines record according to patient, Billing, Disease description, And doctor's prescription record.

   Technology: C# .NET, SQL 2005 , HTML, Java script. CSS, jQuery.
   Project Duration: 2 Months.

   Responsibilities: Sole responsible for all the operations in IPD section.

2. **MOUS Data base Management System (Complete)**

   Scope Of work: MOUS data base management system is a tool developed for M.P State govt. for Industrial land allocation & allotment. Implementation of MOUS allows the state Govt. to track records of all the land in the state. Information includes Name beneficiary, Organization name, Address, financial details , project details, total Investment, duration of allotment, Proposed Employment etc.

   Technology: PHP, MY SQL, JavaScript, JQuery, CSS, HTML.

   Project Duration: 6 Months.

   Responsibilities: Sole responsible for all the operations.

3. **Parmali Wallace (Resource & Efficiency Management)**

   Scope OF work: The project basically consist of 10 phase.
   In which every phase is responsible for resource & efficiency planning &
   Management of different machine shops.
   a) **Tube & Ring:** Tube & ring include different type of product which has a shape like a tube. The scope of this project includes all the phases of production of such kind of product. Including Machine timing, Man Timing, setup timing, cleaning timing, size of the product etc. Compiling all these records together will result in the timing required to produce one single product and also calculate MAN time, Machine time & per piece of product time. This also helps the organization to analyze the efficiency of machines and person particular.

   Technology: PHP, MY SQL, JavaScript, JQuery, CSS, HTML.

   Project Duration: 6 Months.

   Responsibilities: Sole responsible for all the operations.

   All the other shops have the same functionality customized according to their production method.

4. **MPRAF Skills:** MPRAF Skills is again a project for MP state government for the management of a Job oriented Training & placement plan.
   It includes many tasks starting from enrollment of students on different courses at various centers, profiles of PAI's who are responsible for enrolment of student & managing their profile, employee profiles who are responsible to look after all the PAI's In the state, admin look after the employees and PAI's, and super admin to control all the operations performed over the application. The

application is provided with the list of training sectors and the courses offered. Profile of a student include the enrolment date, course, training sector , clearance or non clearance of training program and finally placed or not placed.

The application now helps the state government to keep track of all the educations sectors running, all the courses running in all the sectors, and all the enrolled students in all over the state for all the offered courses.

Technology: PHP, MY SQL, JavaScript, JQuery, CSS, HTML.

Project Duration: 3 Months
Responsibilities: Sole responsible for all the operations.

EXTRA CURRICULAR

All kinds of mobile software.
In sports-part of winning team in Kabbadi and Cricket.
